## Electronic Field Input System

Team 5 Stacy Carlson, Thomas Flores, and Ralph Parkison

## The Problem

- Paper forms submitted via mail
  - Potential for loss
  - Errors during transcription
  - Long time to access the data

## Client Requirements

- Electronic Input System
  - Creel (Top priority)
  - Raw Fish
  - FWIN
- Easily updatable/maintainable
  - Study needs change over time
- Fully functional with Database
- Solution can't depend on an Internet connection

## End User

- Creel Clerk
  - Two types
    - Stationary
    - Bus Route
  - Trained how to do Creel survey
  - Varying computer skills

## Operating Environment

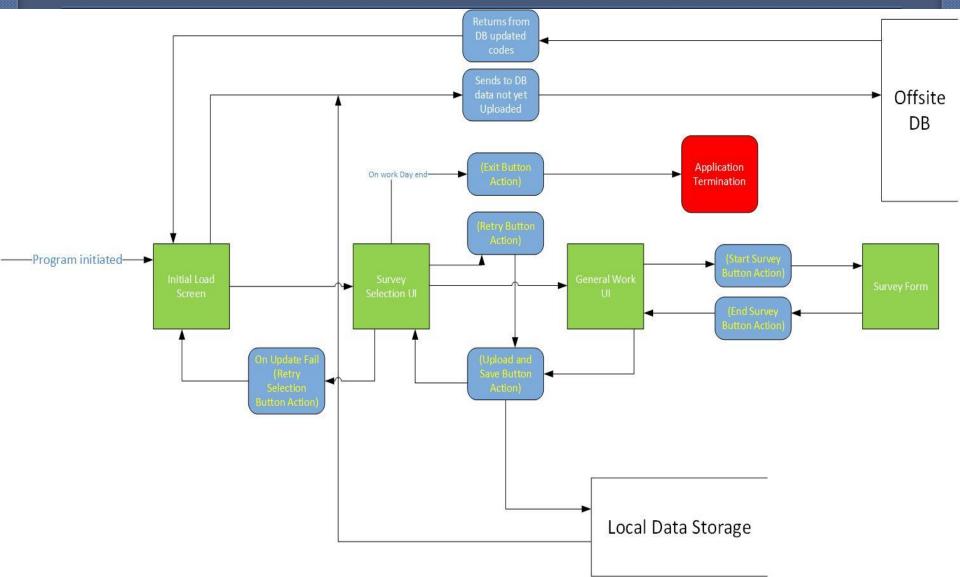

- Getac Tablet
  - Windows 7 Professional (64 bit)
  - Stylus/On screen keyboard

## Specifications

- Windows Application written in C#
- Store data locally in log files
- Interact with Database via JSON

## Overview of the System

User Interface Mockups

# Franklin D. Roosevelt Lake Survey System
